

“  
*Leila Cunningham  
has been the most  
cooperative and pleasant  
person! She took time  
to explain what was  
happening with my  
drainage request.  
MSD hired the „  
right person!*”

— Michael Hebner, Valley Station

## To our customers:

*Customers who are satisfied with the service we provide feel their drainage and sewer fee is money well spent. Our employees' commitment to making our customers happy is evident by the number of letters I receive each day... letters that express gratitude for our work. This issue of Crosscurrents describes recently completed improvements in the services we provide, lists planned projects and contains comments from our most impressed customers. Let us know if we can be of service to you, too.*

*Bud Schardein, Jr.  
Executive Director*

## Flood hazard information found online

A new Web site — [www.loumetrohazmap.org](http://www.loumetrohazmap.org) — provides access to flood hazard information and serves as a proactive floodplain management tool by combining services available through groups like Louisville/Jefferson County Information Consortium, Metro Emergency Management and the Federal Emergency Management Agency.

Visitors to HazMap can access various floodplain management data, including hydrologic and hydraulic models, letters of map change, elevation certifications and floodplain permits. HazMap focuses on the area's primary natural hazard threat, with three interactive sections:

- **Floodplain management** includes an interactive floodplain viewer that plots flood elevation profiles, automated base flood elevation determinations, elevation certificates, floodplain permits, and hydrological and hydraulic model management tools.
- **Map maintenance**, which

supports the review of digital flood insurance rate maps and interacts with FEMA's Mapping Information Platform, to make more accurate and timely changes to local floodplain maps.

- **Mitigation support**, including a benefit/cost calculator to help determine how future flood damages can be reduced.
- A fourth section focuses on **natural hazards**, with maps from Louisville Metro's natural hazard mitigation plan to display a property's vulnerability to natural hazards, and a real-time emergency response and disaster declaration module.

The site was created by a team led by MSD's Randy Stambaugh and Julie Buckler. Funded by a grant from FEMA, the team included representatives from the Commonwealth of Kentucky, University of Louisville, Metro Emergency Management, FMSM Engineers and floodplain management experts.

HazMap was introduced in June at the annual Association of State Flood Plain Managers conference. According to Stambaugh, their responses were positive.

“Our team is preparing a plan for HazMap's next phase,” he said. That will include connecting with FEMA's national Mapping Information Platform, real-time disaster declarations, citizen hazard fact sheets and components to complete the natural hazards section of the site.

*Louisville Metro Hall is protected against Ohio River flooding by the floodwall, but has the added protection of being elevated above the 100-year flood hazard level, according to HazMap, the community's new natural hazard portal.*

## **Protection granted**

*In addition to potentially removing 1,600 properties from risk of flooding, the following neighborhoods will benefit from the \$5 million of federal funding.*

### **Hikes Point, Buechel, Dundee Estates, Germantown and Camp Taylor**

*The South Fork of Beargrass Creek and the Buechel Branch tributary will have increased flood protection as improvements are made to the waterway and eight flood storage basins are constructed. Trees, grasses, shrubs and nine acres of hardwood trees will be planted to decrease the impact of flooding on fish and wildlife.*

### **Okolona, Fairdale and Valley Station**

*Improvements will be made to the 20 miles of streams and two stormwater flood storage basins in Pond Creek. Four miles of water flow improvements will be constructed, native habitat will be restored among 15 acres and a recreational trail will be built along the waterway.*

### **South Louisville, Churchill Downs and the University of Louisville area**

*The Southwest Flood Damage Prevention Study will encompass areas of frequent flooding where basements and automobiles are consistently damaged by water. Study recommendations will likely include construction of flood storage basins.*

### **Buechel, Hikes Point and Highgate Springs**

*Aging sewer systems will be rehabilitated and water quality improved as part of the Sanitary Sewer Overflow Mitigation plan.*

# Federal funding removes risk of flooding

In July, Congresswoman Anne Northup, Deputy District Engineer of the Army Corps of Engineers David Dale and MSD Executive Director Bud Schardein announced that four Louisville projects will receive more than \$5 million in federal funding to help prevent flooding and restore animal habitat and vegetation.

“Over the past eight years, 4,000 properties have been removed from the risk of flooding thanks to approximately \$18 million in federal funding, matched with local drainage dollars,” said Schardein. MSD had previously purchased 46 homes, demolished them and returned the properties to serve as natural wetlands as part of a grant from the Federal Emergency Management Agency and Kentucky Emergency Management. An additional six lots were purchased, and one home was elevated.

The objective, according to MSD’s David Schafflein, is to reduce loss of life and property damage during floods. The properties identified for removal and elevation were located in a floodway or floodplain and had histories of flood damage.

*Congresswoman Anne Northup and MSD Executive Director Bud Schardein announced new flood protection initiatives at one of MSD’s flood protection facilities, the Bashford Manor Flood Storage Basin.*

The new projects will address flooding in Beargrass Creek and Pond Creek areas and will allow for a Southwest Flood Damage Prevention Study and sewer overflow mitigation. Additionally, flood storage basins will be constructed to store stormwater during heavy rains. Damaged and poorly performing infrastructure will be repaired to prevent flooding.

*A flood-prone home once stood at this location that has been restored as a natural wetland. Projects like this limit loss of life and property should flooding occur.*

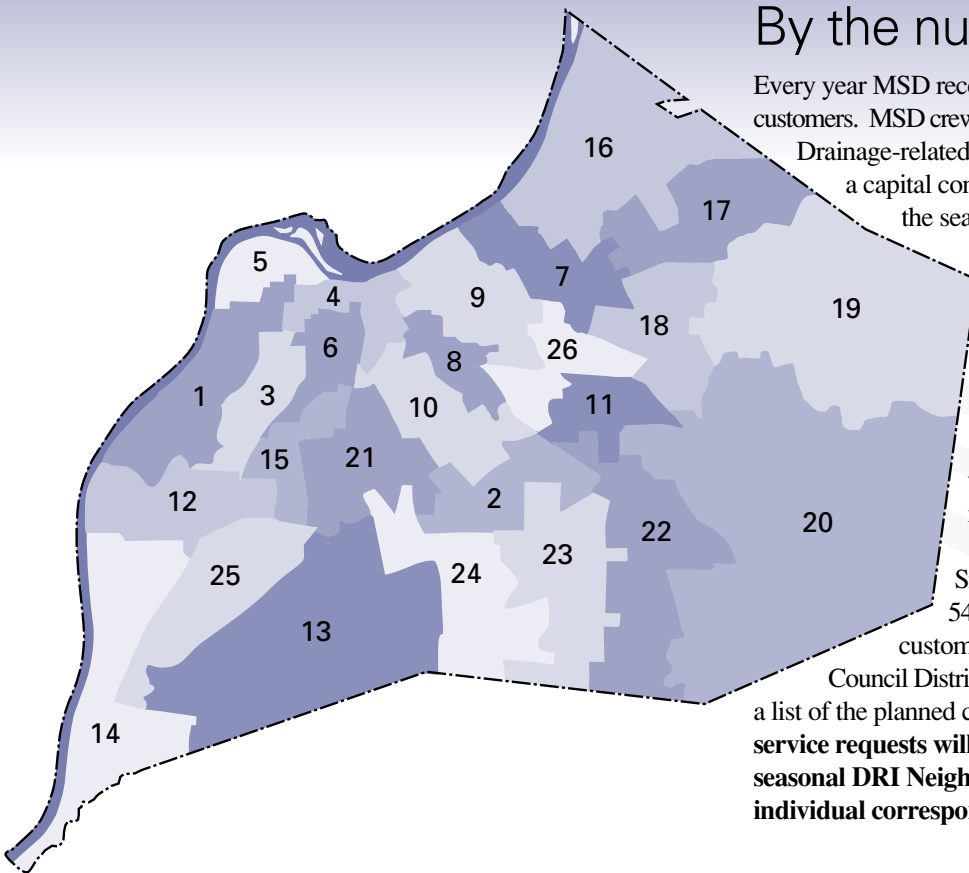

**To report a problem or check the status of an existing service request, contact MSD’s 24/7 Customer Relations Department  
phone: 587-0603  
Internet: [www.msdlouky.org/customer](http://www.msdlouky.org/customer)  
e-mail: [customerservice@msdlouky.org](mailto:customerservice@msdlouky.org)**

## By the numbers

Every year MSD receives thousands of service requests from our customers. MSD crews immediately address sanitary sewer requests. Drainage-related requests are addressed through Project DRI, a capital construction program, or by MSD crews through the seasonal DRI Neighborhood Program.

Currently in its second phase, Project DRI is a partnership between Louisville Metro and MSD to invest more than \$122 million in neighborhood drainage improvements throughout the Louisville Metro area. At the conclusion of Phase II, more than 355 projects will be completed. A third phase of the program is anticipated.

Since the start of 2006, our crews have completed 54,865 Maintenance Work Orders in response to customer requests. Following is a listing by Metro Council District of those completed work orders, along with a list of the planned capital DRI projects. **Customers whose service requests will be addressed by MSD crews in the seasonal DRI Neighborhood Program will be notified through individual correspondence; those activities are not listed here.**

### District 1

*Councilman Leonard A. Watkins*

**Maintenance Work Orders completed since January 2006:** ..... **1,630**  
 Sanitary/Support: ..... 819  
 Drainage: ..... 137  
 Preventive Maintenance: ..... 544  
 Floodwall Protection: ..... 130

**Project DRI**  
 Projects completed: ..... 24  
 Investment to date: ..... nearly \$6.5 million

**Current and planned projects through 2008:**

- Clarene Drive
- Cova Drive
- Diamond Way
- Donald Drive
- Dover Avenue
- Dover Road
- Farnsley Road
- Gerald Drive
- Greendale Drive
- Richmond Road
- Shagbark Road
- Stegner Avenue
- Teakwood Circle

### District 2

*Councilwoman Dr. Barbara E. Shanklin*

**Maintenance Work Orders completed since January 2006:** ..... **1,083**  
 Sanitary/Support: ..... 708  
 Drainage: ..... 209  
 Preventive Maintenance: ..... 166

**Project DRI**  
 Projects completed: ..... 39  
 Investment to date: ..... more than \$7.5 million

**Current and planned projects through 2008:**

- Dahl Road
- Emerald Drive
- Garden Green Way/  
Mansfield Road
- Gordon Road/  
Corinth Road
- Handley Avenue
- Industrial Boulevard
- Norene Lane
- Old Kentucky  
Home Subdivision
- Orville Drive
- Pixley Way
- Rangeland Road
- Rangeland Road,  
Phase 3
- Redfern Road/  
Red Oak Lane
- Regent Road
- Riata Drive/  
Revere Drive
- Robinhood Lane
- Rockwood Road
- Rural Way/Red  
Oak Lane
- Shady Villa Road
- Spicewood Lane
- Sunshine Acres
- Westside Drive
- Yaupon Lane/  
Alba Way

### District 3

*Councilwoman Mary C. Woolridge*

**Maintenance Work Orders completed since January 2006:** ..... **2,497**  
 Sanitary/Support: ..... 1,034  
 Drainage: ..... 49  
 Preventive Maintenance: ..... 1,414

**Project DRI**  
 Projects completed: ..... 4  
 Investment to date: ..... \$435,000

### District 4

*Councilman David W. Tandy*

**Maintenance Work Orders completed since January 2006:** ..... **4,819**  
 Sanitary/Support: ..... 966  
 Drainage: ..... 12  
 Preventive Maintenance: ..... 3,464  
 Floodwall Protection: ..... 377

**Project DRI**  
 Projects completed: ..... 2  
 Investment to date: ..... \$89,000

## District 5

Councilwoman Cheri Bryant Hamilton

### Maintenance Work Orders completed

since January 2006: ..... 1,474  
 Sanitary/Support: ..... 693  
 Drainage: ..... 13  
 Preventive Maintenance: ..... 482  
 Floodwall Protection: ..... 286

### Project DRI

Projects completed: ..... 3  
 Investment to date: ..... \$221,000

### Current and planned projects through 2008:

- Westchester Avenue

## District 6

Councilman George Unseld

### Maintenance Work Orders completed

since January 2006: ..... 2,730  
 Sanitary/Support: ..... 785  
 Drainage: ..... 14  
 Preventive Maintenance: ..... 1,931

### Project DRI

Projects completed: ..... 5  
 Investment to date: ..... \$324,500

### Current and planned projects through 2008:

- Algonquin Parkway

## District 7

Councilman Kenneth C. Fleming

### Maintenance Work Orders completed

since January 2006: ..... 1,166  
 Sanitary/Support: ..... 904  
 Drainage: ..... 87  
 Preventive Maintenance: ..... 175

### Project DRI

Projects completed: ..... 9  
 Investment to date: ..... more than \$1.7 million

### Current and planned projects through 2008:

- Fenley Avenue
- Girard Drive/Woolrich Road
- Green Meadow Court
- Greenlawn Road/Carlimar Road
- Regency Lane
- Stivers Road
- Tyne Road, Beechwood Village

## District 8

Councilman Tom Owen

### Maintenance Work Orders completed

since January 2006: ..... 3,998  
 Sanitary/Support: ..... 1,132  
 Drainage: ..... 43  
 Preventive Maintenance: ..... 2,823

### Project DRI

Projects completed: ..... 8  
 Investment to date: ..... nearly \$1.1 million

### Current and planned projects through 2008:

- Belmont Avenue
- Eastview Avenue
- Emerson Avenue
- Gardiner Lane/Carriage Court
- Lowell Avenue
- Strathmoor Boulevard

## District 9

Councilwoman Tina Ward-Pugh

### Maintenance Work Orders completed

since January 2006: ..... 4,524  
 Sanitary/Support: ..... 1,040  
 Drainage: ..... 70  
 Preventive Maintenance: ..... 3,288  
 Floodwall Protection: ..... 126

### Project DRI

Projects completed: ..... 11  
 Investment to date: ..... more than \$1 million

### Current and planned projects through 2008:

- Country Club Road
- Frankfort Avenue
- University Road

Flooding problems are resolved with drainage improvements like this construction project along Grade Lane.

“ Thank you, Kathy Myers and Debbie Troutman for locating the problem and replacing my property service connection. Now that we don't have any backups, my wife has wandered back down into the basement and relieved me ”  
 from my mandatory laundry duty!

– Dan Green, St. Matthews

## District 10

Councilman Jim King

### Maintenance Work orders completed

since January 2006: ..... 3,414  
 Sanitary/Support: ..... 1,142  
 Drainage: ..... 79  
 Preventive Maintenance: ..... 2,193

### Project DRI

Projects completed: ..... 14  
 Investment to date: ..... more than \$2.9 million

### Current and planned projects through 2008:

- Dyer Avenue
- Ethel Avenue
- Greenup Road
- St. Francis Avenue
- Wolfe Avenue

## District 11

Councilman Kevin Kramer

### Maintenance Work Orders completed

since January 2006: ..... 1,253  
 Sanitary/Support: ..... 680  
 Drainage: ..... 123  
 Preventive Maintenance: ..... 450

### Project DRI

Projects completed: ..... 13  
 Investment to date: ..... more than \$1.4 million

### Current and planned projects through 2008:

- Dogwood Drive
- Glenmeade Road, Phase 2
- Mamaroneck Road
- Six Mile Lane

- Sungold Estates
- Waycross Avenue
- Whispering Hills Drive
- Woodhill Lane

# Treatment plant expansions serve new customers

From one side of Louisville Metro to the other, MSD's customer base is expanding. To keep up with new development and new customers, two treatment plants recently recognized the completion of major construction projects to increase each plant's treatment capacity.

When first constructed, the **West County Wastewater Treatment Plant** in southwest Jefferson County treated only 15 million gallons of wastewater per day. The \$8.7 million construction project addressed an aggressively expanding sewer system, regular neighborhood backups and growing residential and commercial development which required a greater capacity.

Since the third phase of expansion began in 2003, the West County plant

has undergone a series of upgrades to double the plant's capacity to 30 million gallons per day. Improvements also included aeration basins equipped with air diffusers to reduce noise and odor, a new sludge holding tank and a solids transfer station. Additionally, landscape improvements have made the plant less noticeable to neighbors.

In the northeast part of the Metro area, near the Jefferson-Oldham County line, an \$11.1 million expansion of the **Hite Creek Wastewater Treatment Plant**

was completed, enabling the plant to keep pace with customer growth.

Initiated in mid-2003, the plant's processes were upgraded and improved and treatment capacity was increased to allow up to an additional 1.6 million gallons of wastewater per day. Work included new secondary clarifiers, replacing existing equipment in the influent pump station and converting existing primary clarifiers to aeration basins. New clarifiers, pumps, screening and other features also were added to improve efficiency and control odors.

*Celebrating the completion of the Hite Creek plant expansion were (from left) MSD Board Chair Fred Dallenbach; MSD Area Team Leader Vicki Coombs; MSD Chief Engineer Derek Guthrie; Dale Wilson, Earl Dunn and Larry Judy, Judy Construction; Metro Public Works Director Rudy Davidson; MSD Executive Director Bud Schardein; Deputy Mayor Rick Johnstone; and Quest Engineering's Charlie Scroggin.*

*Plant operators, administrators, maintenance personnel and several others were invited to sign a plaque recognizing their efforts in the West County Wastewater Treatment Plant expansion.*

**MSD honors and awards**

The Design-Build Institute of America Ohio Valley Chapter named the **West County Wastewater Treatment Plant** expansion the best project under \$15 million and the best overall project of 2005.

DiverseWorks Administrator and Affirmative Action Officer **Deby Mettling** was named Outstanding Human Resource Supporting Professional in the Louisville Metropolitan Area by the Southern Indiana Chamber of Commerce.

Regulatory Services Manager **Angela L. Akridge, P.E.** was named Young Engineer of the Year by the National Society of Professional Engineers. She received the same honor from the Kentucky Society of Professional Engineers and the Louisville chapter.

The National Association of Clean Water Agencies has awarded a Silver Peak Performance Award to the **Morris Forman Wastewater Treatment Plant.**

The Kentucky-Tennessee Water Environment Association has awarded an Operational Excellence Award to the **Morris Forman Wastewater Treatment Plant.**

## Wheatley to serve as MSD Board Chair

After eight years on MSD’s Board, Beverly Wheatley was elected Chair in July.

Beverly Wheatley  
Chair

Wheatley replaced Fred Dallenbach of Dallenbach Builders who joined the Board in 1997. Dallenbach was elected Chair in 2003. Board members are appointed by the Metro Mayor and Council to serve a three-year term, but not to exceed 10 years in consecutive terms. Dallenbach’s term expired in July.

“Fred has been someone with leadership capabilities I admire and has been good counsel to me over the years,” said Wheatley, “I hope to follow his example and do as good a job as he has done in this position.”

Wheatley is President of Wheatley Roofing Co., Inc. She also is a board member of Republic Bank and Trust Co., University of Louisville Board of Overseers and Iroquois Civic Club-Neighborhood Association. She has served as MSD’s Vice-Chair since 2003.

Audwin Helton  
Vice-Chair

Board member Audwin Helton was elected to the Vice-Chair position. Helton is founder and President of Spatial Data Integrations, Inc. He also is a board member of Greater Louisville, Inc., Fund for the Arts and Kentucky African American Heritage Museum. He serves on the Personnel Committee of MSD’s Board.

“The MSD Board is one of the most challenging boards because our responsibilities to the community are complicated and our operations take some time to learn,” said MSD Executive Director Bud Schardein. “Beverly and Audwin have a clear understanding of our challenges and a vision for our future successes,” he said.
